### School & Classroom Disinfection Solutions

Hand, Foot & Mouth Disease can spread quickly in classrooms, cafeterias, daycare rooms, and shared learning areas. Restoration Management Company (RMC) provides prompt, professional cleaning and high-touch surface sanitizing to help reduce viral presence and support healthier environments for students and staff. With nearly 40 years of experience assisting schools and public facilities, RMC restores learning spaces while helping minimize disruption to daily operations.

Our trained technicians use industry-standard cleaning methods and established safety practices, including proper containment, protection of occupied areas, and thorough cleaning of high-use spaces, while working closely with school administrators, facilities teams, district leadership, and insurance providers to ensure clear communication, coordinated scheduling, and a smooth, reliable response.

### Hand/Foot/Mouth Disease Cleaning & Disinfection Services

- High-touch surface cleaning
- General surface cleaning and wipe-downs
- Emergency after-hours response
- HEPA air filtration
- Targeted room sanitization
- Containment and infection-control barriers

### Reliable Coverage. Local Expertise.

RMC supports K-12 schools, early education centers, preschools, universities and other district campuses with fast, reliable outbreak response and decontamination services. With strategically located offices across the nation and a dedicated response fleet, we mobilize quickly to ensure learning spaces remain safe, compliant, and ready for students.

*RMC is available on most vendor-management platforms*
