Subject: Advancement of workers with disabilities

RMC has had the good fortune of being introduced to SKCAC over the past year. Since the 4th quarter of 2021, we've partnered with this local non-profit by hiring one of their associates on a part time basis.

Jon Kuhlmann has worked closely here with our Seattle Regional Team since last November and we've not only seen tremendous growth in Jon, but his contributions to our Branch have been immeasurable. He's reliable, energetic, and genuine without fault. His presence in our workplace brings joy to all his coworkers here at the Seattle Branch and he's had a positive impact on everyone he interacts with. Jon's honesty, energy and enthusiasm are highly contagious!

In his spare time, Jon does woodworking and has taken it upon himself to create wooden letters for each of us here. These wooden initials are proudly displayed at each of our workstations.

As a result of this pilot programs success, RMC has initiated similar programs in our other facilities located in California, Colorado, Texas, Nevada, and Arizona. We're working closely with local non-profits in our other regions to mirror the successes we've recognized here in Seattle. Additionally, our recruiters are actively implementing hiring disabled veterans transitioning out of military service.

Please contact me if you have any questions.

Sincerely,

Brian Willcut

Branch Manager - Seattle
